

BURAK GÖKSEL

Frontend Developer

Hamburg, Germany | +49 0 171 849 3013 | burak@goksel.co | [LinkedIn](#)

A highly skilled frontend developer with expertise in Angular, TypeScript, and UI/UX optimization. Passionate about crafting seamless user experiences, implementing CI/CD pipelines, and developing scalable applications. Adept at problem-solving and delivering high-quality software solutions within tight deadlines while adhering to latest developments and best practices.

EXPERIENCE

VIDA.place GmbH

Munich, Germany

Frontend Developer

02/2023 – Present

- Independently developing high-quality features from Figma designs, translating visual concepts into functional code.
- Designing and implementing scalable solutions within the design system for consistency and efficiency.
- Optimizing application architecture to enhance speed, stability, and security.
- Collaborating with DevOps teams to streamline CI/CD pipelines for seamless deployment.
- Building backend endpoints in Python, reducing reliance on external dependencies.
- Managing QA processes for code reviews, ensuring high-quality code delivery.
- Leading the transition from GitLab to GitHub for frontend repositories.
- Proven ability to solve complex problems and deliver results under tight deadlines.

Prospeum GmbH

Munich, Germany

Frontend Developer

03/2021 - 01/2023

- Developed and maintained an Angular-based procurement application.
- Introduced a dynamic approach for data grids, generating tables from a configuration file.
- Managed frontend tasks and CI/CD deployment via GitLab.
- Gathered feature requests and collaborated with stakeholders for iterative improvements.
- Co-created development roadmaps and milestone planning.
- Enhanced QA with automated testing, bug tracking, and CI/CD refinement.
- Developed rapid prototypes for new product ideas.

Bilişim A.Ş.

Ankara, Turkey

Frontend Developer & DevOps

01/2020 - 03/2021

- Developed BilisimHR, an Angular-based HR management system.
- Utilized Atlassian suite (Jira, BitBucket, Bamboo, Confluence) for project management and DevOps.
- Migrated reverse-proxy configurations from Nginx to Traefik.
- Set up monitoring tools such as Graylog, Grafana, and Prometheus.
- Updated Angular and NPM packages to maintain stability and security.

StockMount

Ankara, Turkey
